MyCVBlog

PDF Link Test

This public sample confirms that a Markdown link can open a PDF attachment from a MyCVBlog note or project page.

File location

`assets/documents/pdf-link-test.pdf`

Markdown example

```
[Open the local PDF sample](assets/documents/pdf-link-test.pdf)
```

In your Markdown file, write the link text and URL together on one line. The site resolves the asset path from nested note and project pages.

Your browser may show its PDF viewer or offer to save the file, depending on its settings. This sample contains no personal information.
